

Case History: X-Shield StainBlock Sealer Sealing of Barbecue Area at Wild Wadi Water Park, Dubai

During the 2007 renovation of the park, a new barbecue area was installed. To avoid oil and fat from the barbecue staining the stone facades and floors, X-Shield StainBlock Sealer was applied. Using low pressure spray equipment the sealer was applied in the late evening and was open for use the following morning.

X-Shield StainBlock Sealer is a high performance fluorochemical designed for use in areas requiring water, oil and stain resistance. It also imparts outstanding anti-fouling properties and does not alter the appearance of the substrate.
